

please summarize this document:

<https://www.federalreserve.gov/monetarypolicy/files/fomcprojt20240918.pdf>

I am unable to open the link directly, but you can download the PDF and provide its content or key sections. Alternatively, I can explain the general structure and purpose of documents like the one you linked, which is a Federal Open Market Committee (FOMC) projection table. These typically contain:

- **Economic projections** for growth, unemployment, inflation, and interest rates.
- **Baseline projections** for the federal funds rate.
- **Inflation expectations** like PCE inflation and core PCE.

Let me know how you'd like to proceed!
